# LEGALEASE – AI

PHASE 1: BRAINSTORMING & IDEATION

## 1. Problem Statement

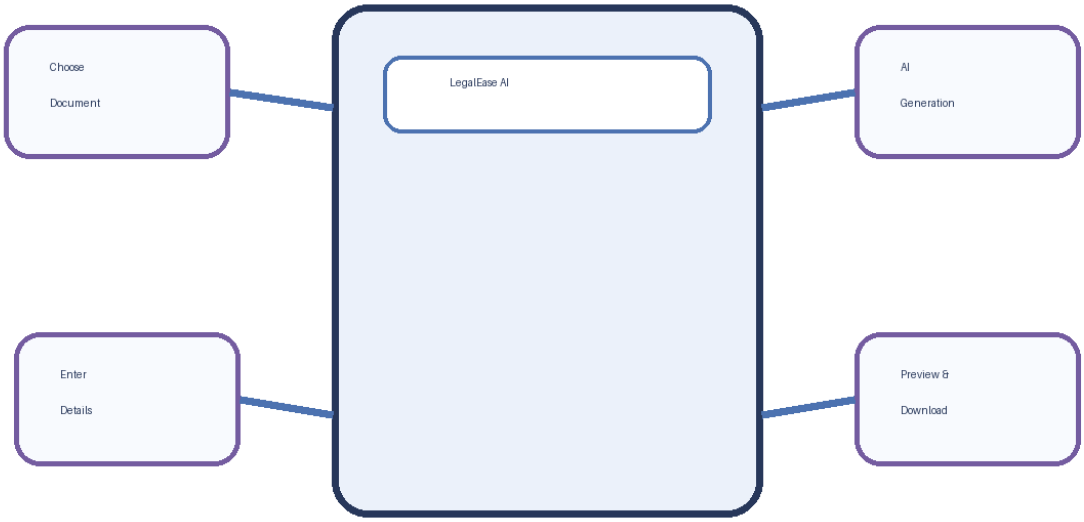

Preparing a legal document manually can be time-consuming and confusing, especially for people who are unfamiliar with legal formats. LegalEase aims to simplify the first-draft process by guiding users through a structured form and generating an editable document.

## 2. Why this idea?

- Users need a simple starting draft before professional review.
- Different documents need different information and formats.
- A guided form can reduce repeated manual formatting.
- AI can convert structured user information into readable draft content.

IDEATION: SOLUTION & OBJECTIVES

## 3. Proposed Solution

LegalEase is an AI-powered application that helps users create first-draft legal documents from guided inputs. Users select a document type, enter the required details, and receive a draft that can be reviewed and edited.

## 4. Objectives

- Generate legal document drafts using AI.
- Provide a simple and user-friendly input process.
- Support multiple common document types.
- Allow users to preview and edit generated content.
- Provide downloadable PDF, DOCX and TXT output.

## 5. Core Technology Idea

- Streamlit – web interface.
- FastAPI – backend/API processing.
- Gemini AI – document content generation.
- Python – application logic and document workflow.

# LEGALEASE – AI

IDEATION: TARGET USERS & USE CASES

## 6. Target Users

- Individuals – basic personal document drafts.
- Freelancers – simple service-related drafts.
- Small business owners – routine business documents.
- Landlords and tenants – common rental-related drafts.

## 7. Example Use Cases

| USE CASE | SIMPLE FLOW |
|---|---|
| Rental Agreement | Select type → enter details → generate |
| Service Agreement | Enter service and payment terms → generate |
| Declaration / Letter | Choose type → enter personal details → create |
| Basic Business Document | Provide business details → generate editable draft |

## 8. User Need

The application should make drafting easier to understand while keeping the user in control of the information entered and the final document.

# LEGALEASE – AI

IDEATION: FEATURES, WORKFLOW & SAFETY

## 9. Main Features

- Selection of legal document type.
- Guided user input form.
- AI-powered document generation.
- Document preview and editing.
- Download options: PDF, DOCX and TXT.
- Validation of required fields before generation.

## 10. Proposed User Workflow

1) Select document type → 2) Fill details → 3) Generate draft → 4) Review/Edit → 5) Download

## 11. Legal Disclaimer

Documents generated by LegalEase are intended as informational first drafts only. They are not a substitute for professional legal advice. Users should review the document carefully and consult a qualified legal professional before using it for official or legal purposes.

## 12. Phase 1 Outcome

The brainstorming phase defines the problem, target users, solution concept, major features and initial technology direction. These points can be carried forward into Phase 2: Requirement Analysis.
