■ LegalEase

PHASE 3 | PROJECT DESIGN

A clear blueprint for a smarter legal-support platform

01 PROJECT OVERVIEW • KEY MODULES

■ Project Overview

LegalEase is designed to help users upload legal documents, analyze their contents, retrieve relevant legal information, and view understandable results.

■ Key Modules

01 User Authentication — Register & login

02 Document Upload — Submit legal documents

03 Document Analysis — Process uploaded content

04 Legal Information — Retrieve relevant resources

05 Result Generation — Present analysis clearly

06 Report Download — Save the generated result

02 DESIGN GOALS

SIMPLE

Clear and easy user journey.

MODULAR

Separate authentication, documents, analysis and reporting.

SCALABLE

Allow future legal services and APIs.

USER-FOCUSED

Show complex legal information in readable form.

■ LegalEase

SYSTEM ARCHITECTURE & USE CASE DESIGN

03 SYSTEM ARCHITECTURE

■ USER	■ FRONTEND	■ BACKEND	■ AI / LEGAL
Login • Upload • View	Web UI • HTML/CSS/JS or I	API / Server • Node.js / Expı	Analysis + Legal APIs / NLP if applicable

Frontend

Collects user input and displays results.

Backend

Handles APIs, validation and application logic.

Database

Stores users, documents and results.

AI / External APIs

Supports document analysis and legal information retrieval.

04 USE CASE DESIGN

ACTOR	USE CASE
USER	Register / Login
USER	Upload Legal Document
USER	Analyze Document
USER	View Results
USER	Download Report

Optional Admin: manage users and system content, only if included in the actual implementation.

■ LegalEase

PROCESS FLOW & DATABASE DESIGN

05 DOCUMENT ANALYSIS FLOW

1	START
2	LOGIN / REGISTER
3	UPLOAD DOCUMENT
4	VALIDATE FILE
5	PROCESS & ANALYZE
6	GENERATE RESULT
7	DISPLAY RESULT
8	DOWNLOAD REPORT
9	END

06 ER DIAGRAM • DATABASE DESIGN

USER

user_id (PK)
name
email
password

DOCUMENT

document_id (PK)
user_id (FK)
file_name
upload_date
status

RESULT

result_id (PK)
document_id (FK)
analysis_text
created_at

Relationships: One user can upload multiple documents. Each document can have an associated analysis result. If legal-information retrieval is included, a separate legal-information entity/table can be linked to the document or analysis.

■ Database fields should be updated to match the final implementation.

LegalEase

UI DESIGN • TECHNOLOGY STACK • DELIVERABLES

07 UI / WIREFRAME PLAN

LOGIN	DASHBOARD	UPLOAD	RESULT
Email Password Login	Welcome Upload View Resu	Choose file Validate Upload	Summary Key points Download

08 TECHNOLOGY STACK

FRONTEND	React.js / HTML / CSS / JavaScript
BACKEND	Node.js / Express.js
DATABASE	MongoDB / MySQL
AI / NLP	AI or NLP service, if used in the implementation
APIs	Legal information APIs, if used
TOOLS	GitHub • VS Code • Postman

09 PHASE 3 DELIVERABLES

- ✓ System Architecture Diagram
- ✓ Use Case Diagram
- ✓ Process Flowchart
- ✓ ER / Database Design
- ✓ UI Wireframes
- ✓ Project Design Document (PDF)

Important: Replace example technologies, modules and database fields with the exact components used in your LegalEase implementation.
